

Timber Bridge

Manufacturers Information | A-NAT-2214

Material Specifications

Bridge	Cypress Timber
Fixings and footings	Stainless Steel

Equipment Specifications

Free Height of Fall	Not required
Fall Zone Size	Not required
Activity Space Recomm.	Allow 1m around equipment
Highest Point	Rail 730mm

Other Required Information

Spare Parts	Available to order
Largest Part	Bridge
Heaviest Part	Bridge 41kg + Machinery Assistance

Standards

AS 4685 2021 Series

Applications

Age Group	All ages
Supervision Level	Young children should be supervised and inappropriate activities discouraged
Playspaces	Public parks, schools, early childhood centres commercial play areas
Environment	Shade preferred for user comfort and protection.
Vandalism Resistance	Low susceptibility

Please note

Our Natura Play Elements ranges are made as original pieces, not mass-produced. The character of each piece will be affected by the individual timber available at the time of production. The above image should be used as a guide only.

Whilst care is taken to select the best materials, timber is a natural material that is expected to seasonally expand and contract over time and when subjected to temperature extremes. We use Ironbark and Cypress timber in our designs, Cypress timber in particular is prone to fine checking and knots are very common. Accordingly, timbers supplied may have checks and knots that are not structurally compromising.
